Have you ever had the sense that your thoughts might actually be doing something?

Ken Elliott's personal experiences and the stories in this book describe exactly how your thoughts create matter and concepts. What you are thinking directly influences your life but it has never been fully explained until now.

At last, the true secret is revealed about how thoughts create reality. This is the game changer, the real knowledge behind the workings of manifesting and the law of attraction. The author has first-hand knowledge of something spectacularly new and fundamentally important. This is ground-breaking information, a new discovery that is described in this book for the very first time.

This is that rare book with new evidence that will change your view of the world. It clearly and simply explains creation itself. For 20 years, Ken has experienced sending objects via thought and having them take form in real-time.
